

[🏠](#) » Installation

Installation

Install the latest [pypi](#) release with `pip install -U django-jazzmin`

Add `jazzmin` to your `INSTALLED_APPS` before `django.contrib.admin`, and Voila!

```
INSTALLED_APPS = [  
    'jazzmin',  
    'django.contrib.admin',  
    [...]  
]
```

See [configuration](#) for optional customisation of the theme

See [development](#) for notes on setting up for development
